NEW QUESTION: 1
You have a C# application.
The application requires 500 MB of available memory.
You need to identify whether there is enough available memory when the application starts.

Which class should you use?
A. MemoryStream
B. PerformanceCounter
C. OutOfmemoryException
D. DiagnosticsConfigurationHandler
Answer: B
Explanation:
Explanation: The counter is the mechanism by which performance data is collected. The registry stores the names of all the counters, each of which is related to a specific area of system functionality. Examples include a processor's busy time, memory usage, or the number of bytes received over a network connection.
