NEW QUESTION: 2

You have a C# application.

The application requires 500 MB of available memory.

You need to identify whether there is enough available memory when the application starts.

Which class should you use?

A. DiagnosticsConfigurationHandler

- B. PerformanceCounter
- C. OutOfMemoryException
- D. MemoryStream

Answer: B

Explanation:

The counter is the mechanism by which performance data is collected. The registry stores the names of all the counters, each of which is related to a specific area of system functionality. Examples include a processor's busy time, memory usage, or the number of bytes received over a network connection.
