Some candidates reflect our dumps torrent is even totally same with their real test, Online privacy problem increasingly about purchasing S1000-013 exam dumps become a hot issue in the modern life so that almost **Cert S1000-013 Guide** all shoppers worry about the privacy leaking when they take on the businesses on online payment platform.

We ensure the contents are up to date because we have special **Cert S1000-013 Guide** person responsible for updating, We have so many customers covering many countries around the world.

The whole material of the IBM S1000-013 dumps are related to the exam, That is to say, most of questions in our S1000-013 exam simulator are tightly linked with the tested points in the exam.

Once download and installed on your PC, you can practice S1000-013 test questions, review your questions & answers using two different options' practice exam' and 'virtual exam'.

Virtual Exam - test yourself with [Exam C-SEN-2005 Sample](#) exam questions with a time limit.

Practice Exam - review exam questions one by one, see correct answers.

Passing industry-relevant certification exams is always worthwhile to make your place or consolidate the existing one in the Buolkab industry, There are also the Value pack of our S1000-013 study materials for you to purchase.

If you are suspicious about something, Exam S1000-013 Book just tell us by Email, and we will fix them as soon as possible.

NEW QUESTION: 1

You need to configure permissions for Appl administrators.

What should you do?

Case Study Title (Case Study):

Topic 4, A.Datum

Background

General Background

You are a SharePoint administrator for A, Datum Corporation. A, Datum is a large legal firm with offices in Chicago, New York,

and London. A, Datum is merging with a smaller legal firm named Fabrikam, Inc.

Technical Background

A, Datum has an Active Directory Domain Services (AD DS) domain named adatum.com. The domain contains an Active Directory Rights Management Services (AD RMS) server.

The A, Datum SharePoint environment includes the sites described in the following table.

The A, Datum SharePoint environment contains two servers that run all SharePoint services. The servers run Windows Server 2012 and are members of the domain. A third-party file-level antivirus application runs on all servers in the domain. The adatum.com farm uses Microsoft SQL Server 2012 for the SharePoint databases.

A, Datum is planning a three-tier SharePoint farm to replace the existing farm. A firewall will be placed between each tier. All servers must be virtualized unless otherwise specified. The following servers are available for the new SharePoint environment: All user accounts are stored in and maintained by using Active Directory. The My Site portal and document portal SharePoint sites receive user and group membership information by using Active Directory synchronization. New users often have to wait more than 24 hours before they can view their user profile information.

Fabrikam has an AD DS domain named fabrikam.com and a single-server SharePoint environment.

Web Applications

A new remote web application named Appl will be hosted in the adatum.com domain. Appl will require access to SharePoint resources in the fabrikam.com domain. SharePoint administrators in the fabrikam.com domain must be able to administer Appl by using Windows PowerShell.

Technical Requirements

You must meet the following technical requirements:

- Fabrikam users must be able to directly access internal SharePoint resources in the adatum.com domain.
- Datum users must not be able to access resources in the fabrikam.com domain.
- All documents relating to the merger must contain a barcode, and must be protected from distribution.
- Authenticated users must not be prompted for credentials when they access Appl.
- Users in the adatum.com domain must be able to access all SharePoint sites the same day they receive their Active Directory account credentials.
- When a user account is deleted, the user's personal site collection must automatically be removed within 12 hours.
- The antivirus application must not scan SharePoint directories.

When migrating the SharePoint environment, you must meet the following requirements:

- The application and database servers must not be accessible from the Internet.
- The database servers must accept connections only from the SharePoint servers.
- The database servers must be physical machines running Windows Server 2012 with direct access to storage.
- The database servers must be configured for redundancy.
- All database transaction logs must be sent off-site.
- All SharePoint installation prerequisites must be installed offline.

- A.** Add the fabrikam.com SharePoint administrators as site collection administrators.
- B.** Add the fabrikam.com SharePoint administrators to the SharePoint_Shell_Access role.
- C.** Add the adatum.com SharePoint administrators to the SharePoint_Shell_Access role.
- D.** Add the adatum.com SharePoint administrators as site collection administrators.

Answer: B

NEW QUESTION: 2

ClearPass Onboard is used primarily to automate which type of network connections?

- A.** employee 802.1x
- B.** guest self-registration
- C.** visitor health checks
- D.** guest captive portal
- E.** VPN

Answer: C

NEW QUESTION: 3

One of these statements about the key elements of a good configuration process is NOT true

- A.** Control modifications to system hardware in order to prevent resource changes
- B.** Ensure that all requirements remain clear, concise, and valid
- C.** Ensure changes, standards, and requirements are communicated promptly and precisely
- D.** Accommodate the reuse of proven standards and best practices

Answer: A

Explanation:

Configuration management isn't about preventing change but ensuring the integrity of IT resources by preventing unauthorised or improper changes. According to the Official ISC2 guide to the CISSP exam, a good CM process is one that can:

- (1) accommodate change;

- (2) accommodate the reuse of proven standards and best practices;
- (3) ensure that all requirements remain clear, concise, and valid;
- (4) ensure changes, standards, and requirements are communicated promptly and precisely; and
- (5) ensure that the results conform to each instance of the product.

Configuration management Configuration management (CM) is the detailed recording and updating of information that describes an enterprise's computer systems and networks, including all hardware and software components. Such information typically includes the versions and updates that have been applied to installed software packages and the locations and network addresses of hardware devices. Special configuration management software is available. When a system needs a hardware or software upgrade, a computer technician can access the configuration management program and database to see what is currently installed. The technician can then make a more informed decision about the upgrade needed. An advantage of a configuration management application is that the entire collection of systems can be reviewed to make sure any changes made to one system do not adversely affect any of the other systems. Configuration management is also used in software development, where it is called Unified Configuration Management (UCM). Using UCM, developers can keep track of the source code, documentation, problems, changes requested, and changes made. Change management In a computer system environment, change management refers to a systematic approach to keeping track of the details of the system (for example, what operating system release is running on each computer and which fixes have been applied).

NEW QUESTION: 4

Sie stellen eine virtuelle Maschine (VM) bereit, um Microsoft SQL Server in Azure auszuführen. Die Umgebung erfordert derzeit 10.000 IOPS und zwei Terabyte (TB) Daten. Sie erwarten, dass sich das IOPS- und Datenvolumen in den ersten sechs Monaten nach der Bereitstellung verdoppelt. Der Server ist derzeit mit einem Azure Blob-Speichervolumen als Laufwerk F: auf dem SQL Server konfiguriert. Sie müssen sicherstellen, dass die Umgebung die Wachstumsanforderungen unterstützt und gleichzeitig die kostengünstigste Lösung bietet. Welche vier Aktionen sollten Sie nacheinander ausführen? Verschieben Sie zum Beantworten die entsprechenden Aktionen aus der Liste der Aktionen in den Antwortbereich und ordnen Sie sie in der richtigen Reihenfolge an.

Answer:

Explanation:

- 1 - Add four premium storage volumes in Azure Blob storage
- 2 - Formate each storage volume individually
- 3 - Create a new storage pool within the VM
- 4 - Create a virtual disk within the storage pool
