Bubba Corporation has a registered public offering of 500,000 shares at \$36. Of these, 300,000 shares were authorized by unissued and 200,000 shares were sold on behalf of an affiliated person.

What is evident from this information?

- A. the entire proceeds of the offering are a primary offering accruing to the corporation
- B. 60% of the proceeds are paid to the corporation and the balance accrues to the affiliated person
- C. 300,000 shares are identified as a primary distribution
- D. both B and C

Answer: D

Explanation:

Explanation/Reference:

Explanation: both B and C.

The 200,000 shares are sold on behalf of the affiliated person so the proceeds go to that individual. Only the other 300,000 shares are a primary offering.

NEW QUESTION: 2

During an application audit, an IS auditor finds several problems related to corrupted data in the database.

Which of the following is a corrective control that the IS auditor should recommend?

- A. Establish controls to handle concurrent access problems.
- B. Define standards and closely monitor for compliance.
- C. Ensure that only authorized personnel can update the database.
- D. implement data backup and recovery procedures.

Answer: D

Explanation:

Explanation/Reference:

Explanation:

Implementing data backup and recovery procedure is a corrective control, because backup and recovery procedures can be used to roll back database errors. Defining or establishing standards is a preventive control, while monitoring for compliance is a detective control. Ensuring that only authorized personnel can update the database is a preventive control. Establishing controls to handle concurrent access problems is also a preventive control.
