NEW QUESTION: 3
Refer to the exhibit.

A technician is troubleshooting a host connectivity problem.
The host is unable to ping a server connected to Switch_
A. The host NIC is not functioning.
B. A local physical layer problem exists.
C. TCP/IP has not been correctly installed on the host.
D. A remote physical layer problem exists.
E. Based on the results of the testing, what could be the problem?
Answer: B
Explanation:
Here we see that the host is able to ping its own loopback IP address of 127.0.0.1 and it's own IP address of 10.0.0.35, so we know that the NIC is functioning and that the host's TCP/IP stack is OK. However, it is not able to ping the IP address of its local default gateway, so we know that there is a local cabling problem between the switch and the router.
