NEW QUESTION: 1

You work as a Database Administrator (DBA) for a company named ABC.com.

The company uses a Microsoft SQL Server 2012 infrastructure. You are configuring a highly-available database solution using an AlwaysOn availability group on two servers running SQL Server 2012.

The two servers are in separate datacenters.

The two datacenters are connected by a fast WAN link with a network latency of less than 10ms.

Which of the following failover types should you configure for the availability group?

A. You should configure the Asynchronous automatic failover

failover type.

B. You should configure the synchronous manual failover failover type.

C. You should configure the asynchronous manual failover failover type.

D. You should configure the synchronous automatic failover failover type.

Answer: D
