**NEW QUESTION: 2**

Configure a Cisco switch to mirror traffic from a specific source IP address to a specific destination IP address. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

1. Configure the destination IP address.

2. Configure the source IP address.

3. Enable the mirroring.

4. Configure the destination interface.

5. Enable the mirroring.

6. Configure the source interface.

7. Configure the destination IP address.

8. Configure the source IP address.

**Answer:**

Explanation:

**NEW QUESTION: 3**

You are a database administrator of a Microsoft SQL Server 2012 environment. The environment contains two servers named SQLServer01 and SQLServer02. The database Contoso exists on SQLServer01.

You plan to mirror the Contoso database between SQLServer01 and SQLServer02 by using database mirroring.

You need to prepare the Contoso database for database mirroring.

Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

**Answer:**

Explanation:

Explanation

Box 1: \$cluster = Get-Cluster

The Get-Cluster cmdlet gets information about one or more failover clusters in a given domain.

This cmdlet can obtain a variety of configuration and state information about a failover cluster, including the following items, such as the EnabledSharedVolumes property.

Box 2: \$cluster.EnabledSharedVolumes = "Enabled"

Box 3: Add-ClusterSharedVolume "Disk1"

The Add-ClusterSharedVolume cmdlet makes a volume available in the Cluster Shared Volumes in a failover cluster. The Cluster Shared Volume must be chosen from the disks in Available Storage (that is, disks that have been added to the cluster but not assigned to a specific use in the cluster).
