So why are you still waiting and seeing, All in all if you feel upset about the CPP-Remote exams we will be your best choice, Sowe should equip us with useful knowledge and Valid CPP-Remote Practice Questions keep the information updating all the time to catch up with the pace of the times.

NEW QUESTION: 1

You need to ensure that the CourierMobile app determines whether the franchisee owns the account.

What should you do?

- A.** Use the SharePoint user credentials of the bicycle messenger to connect to SharePoint and read from the Accounts list in the site collection.
- B.** Use OAuth and App+User security. Request the Read right from the `http://sharepoint/content/ sitecollection` scope URI.
- C.** Use OAuth and App only security. Request the Read right from

the `http://sharepoint/content/sitecollection/web/list` scope URI.

D. Use `SPSecurity.RunWithElevatedPrivileges` to connect to SharePoint and read from the Accounts list in the site collection.

Answer: B

Explanation:

* SharePoint uses three types of authorization policies. The user-only policy requires only that the call to SharePoint include an authenticated user identity. The app-only policy requires only that the call include only an authenticated app identity. The user+app policy requires that the call include both kinds of authenticated identities.

*You may have already heard that OAuth 2.0 plays an important role in the authentication and authorization of apps for SharePoint. It does, but it is not necessarily a part of the authorization story for every app for SharePoint. If you plan to build an app for SharePoint that runs in a remote web application and communicates back to SharePoint using server-side code, you will need to use OAuth.

Scenario:

*The CourierMobile app must be able to connect to the SharePoint Customers list and verify whether the account belongs to the franchisee to avoid pickups or deliveries to customers that do not belong to the franchisee. When the CourierMobile app accesses the Customers list, it must only read its contents with the minimum permissions necessary.

*Margie's Travel provides an API to enable external developers to authenticate by using OAuth and claims-based authentication. Many couriers are members of Margie's Travel

NEW QUESTION: 2

A. Option C

B. Option B

C. Option A

D. Option D

Answer: B

NEW QUESTION: 3

Hotspot Question

You need to prepare the environment to implement the planned changes for Server2.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Create a Recovery Services vault

Create a Recovery Services vault on the Azure Portal.

Box 2: Install the Azure Site Recovery Provider

Azure Site Recovery can be used to manage migration of on-premises machines to Azure.

Scenario: Migrate the virtual machines hosted on Server1 and Server2 to Azure.

Server2 has the Hyper-V host role.
