Answer:
Explanation:

Explanation:
Box 1: var todoTable = client GetSyncTable<TodoItem>()
To setup offline access, when connecting to your mobile
service, use the method GetSyncTable instead of GetTable
(example):
IMobileServiceSyncTable todoTable =
App.MobileService.GetSyncTable(); / Box 2: await
todoTable.PullAsync("allTodoItems",todo.Table.CreateQuery());
Your app should now use IMobileServiceSyncTable (instead of
IMobileServiceTable) for CRUD operations. This will save
changes to the local database and also keep a log of the
changes. When the app is ready to synchronize its changes with
the Mobile Service, use the methods PushAsync and PullAsync
(example):
await App.MobileService.SyncContext.PushAsync();
await todoTable.PullAsync();
