NEW QUESTION: 1

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

Your network contains an Active Directory domain named contoso.com. The domain contains a file server named Server1 that runs Windows Server 2016.

Server1 has a shared folder named Share1.

You plan to create a subfolder in Share1 for each domain user. You need to limit each user to using 100 MB of data in their respective subfolder. The solution must enable the users to be notified when they use 80 percent of the available space in the subfolder.

Which tool should you use?

- A. File Explorer
- B. Disk Management
- C. File Server Resource Manager (FSRM)

- D. Computer Management
- E. Server Manager
- F. Storage Explorer

NEW QUESTION: 2

Your customer successfully performed the disqualification process on a supplier. What happens next to the supplier with regards to their commodity and region status?

- A. Their preferred status is removed and the qualification process starts automatically to requalify them
- B. The supplier CANNOT be qualified for that specific commodity and region category again.
- C Any preferred supplier status for the disqualified commodity categories and regions is automatically removed.
- C. Their bids are removed from in progress sourcing events using this commodity and region combination in which they have participated.

Answer: A

NEW QUESTION: 3

Amazon S3 is used to store data for a customer's application. The customer wants to ensure that the data is encrypted at rest. Which of the following is the most secure and cost-effective solution?

- A. Apache Spark on Amazon EMR with encryption at rest enabled for the Amazon S3 buckets.
- B. AWS Data Pipeline with encryption at rest enabled for the Amazon S3 buckets.
- C. Apache Hive on Amazon EMR with encryption at rest enabled for the Amazon S3 buckets.
- D. AWS Glue with encryption at rest enabled for the Amazon S3 buckets.

î,,αî •í•©ë<^ë<α.

Answer: D

Explanation:

AWS Glue is the correct answer because this option requires the least amount of setup and maintenance since it is serverless, and it does not require management of the infrastructure. A, C, and D are all solutions that can solve the problem, but require more steps for configuration, and require higher operational overhead to run and maintain.
