NEW QUESTION: 1

Which of the following is a valid IP address for a host on a network?

- A. 192.168.1.1
- B. 192.168.1.1.1
- C. 192.168.1.1.1.1
- D. 192.168.1.1.1.1.1

Answer: D

NEW QUESTION: 2

Drag and Drop Question

Drag and drop the WLAN components from the left onto the correct descriptions on the right.

Answer:

Explanation:

Explanation:

The service port can be used management purposes, primarily for out-of-band management.

However, AP management traffic is not possible across the service port. In most cases, the service port is used as a "last resort" means of accessing the controller GUI for management purposes. For example, in the case where the system

distribution ports on the controller are down or their communication to the wired network is otherwise degraded. A dynamic interface with the Dynamic AP Management option enabled is used as the tunnel source for packets from the controller to the access point and as the destination for CAPWAP packets from the access point to the controller. The virtual interface is used to support mobility management, Dynamic Host Configuration Protocol (DHCP) relay, and embedded Layer 3 security such as guest web authentication. It also maintains the DNS gateway host name used by Layer 3 security and mobility managers to verify the source of certificates when Layer 3 web authorization is enabled.

NEW QUESTION: 3

You administer a Microsoft SQL Server 2016 instance. The instance contains a database that supports a retail sales application.

The application generates hundreds of transactions per second and is online 24 hours per day and 7 days per week. You plan to define a backup strategy for the database.

You need to ensure that the following requirements are met:
No more than 5 minutes worth of transactions are lost.

Data can be recovered by using the minimum amount of administrative effort.

What should you do? Choose all that apply.

- A.** Configure the database to use the SIMPLE recovery model.
- B.** Configure the database to use the FULL recovery model.
- C.** Create a DIFFERENTIAL database backup every 24 hours.
- D.** Create a LOG backup every 5 minutes.
- E.** Create a DIFFERENTIAL database backup every 4 hours.
- F.** Create a FULL database backup every 24 hours.

Answer: B,D,E,F

Explanation:

If there are only three options, the CDE (exclude differential backup), is the best answer.

NEW QUESTION: 4

A worker's payroll frequency changes from weekly to monthly. What action should you take?

- A.** Terminate the worker's assignment record associated to the weekly payroll. Create a new assignment record and associate it to the monthly payroll.
- B.** End the weekly payroll record to the worker and add a new monthly payroll record.
- C.** Update the weekly payroll definition and change the calendar to a weekly frequency.

D. Transfer the worker from the weekly payroll to the monthly payroll.

Answer: B
