Answer: B

NEW QUESTION: 2

APIC-EM is a Cisco solution for automating network configuration. Which of the following is a benefit of APIC-EM?

- A.
- B.
- C.
- D.

Answer: B

NEW QUESTION: 3

When we create a Process Map we use a diamond shape to designate a _____.

- A. Standard Activity is defined
- B. Process has come to an end
- C. Report must be filed
- D. Decision point has been reached

Answer: D

NEW QUESTION: 4

After a company is out of an emergency state, what should be moved back to the original site first?

- A. Least critical components
- B. IT support staff
- C. Executives
- D. Most critical components

Answer: A

Explanation:

This will expose any weaknesses in the plan and ensure the primary site has been properly repaired before moving back. Moving critical assets first may induce a second disaster if the primary site has not been repaired properly. The first group to go back would test items such as connectivity, HVAC, power, water, improper procedures, and/or steps that has been overlooked or not done properly. By moving these first, and fixing any problems identified, the critical operations of the company are not negatively affected.
