It is known to all of us, all these wonderful things I mention above are pursued by us for the whole life (JN0-222 study guide), Owing to our superior quality and our service, our JN0-222 study guide has met with warm reception among the workers and students.

NEW QUESTION: 1
You are responsible for purchasing computer hardware for a school district. You have been looking at various sales brochures advocating various types of memory. What would be one advantage to buying dual-channel memory?
A. It will reduce memory bottlenecks.
B. It will be twice as fast as single channel memory.

C. It will have more memory capacity than single channel memory.
D. It has no advantage over single channel memory.
Answer: A
Explanation:
Dual Channel memory offers two channels for data to move through it. This may reduce
bottle necks.
Answer options B and D are correct. The dual or single channel issue is unrelated to
memory speed or capacity.
Answer option C is incorrect. It will have an advantage over single channel, though the
advantages are slight.

configuration/

NEW QUESTION: 2
A Developer is writing an imaging micro service on AWS Lambd
a. The service is dependent on several libraries that are not
available in the Lambda runtime environment.
Which strategy should the Developer follow to create the Lambda
deployment package?
A. Create a ZIP file with the source code. Stage the dependent
libraries on an Amazon S3 bucket indicated by the Lambda
environment variable LD_LIBRARY_PATH
B. Create a ZIP file with the source code and a script that
installs the dependent libraries at runtime.
C. Create a ZIP file with the source code and all dependent
libraries.
D. Create a ZIP file with the source code and a buildspec.yaml
file that installs the dependent libraries on AWS Lambda.
Answer: B

C.
ã'¨ãf³ã'¿ãf¼ãf—ãf©ã'¤ã'ºCAè‡ªå·±ç½²å••è"¼æ˜Žæ>¸ã'ç"Ÿæ^•ã•—ã•¾ã•™
D. crypto key generate rsaã'ä½¿ã•£ã•¦é•µã'ç"Ÿæ^•ã•™ã'<
Answer: B,D
Explanation:
Here are the steps:
* Configure a hostname for the router using these commands.
yourname#configure terminal
Enter configuration commands, one per line. End with CNTL/Z.
yourname (config)#hostname LabRouter
LabRouter(config)#
* Configure a domain name with the ip domain-name command
followed by whatever you would like your domain name to be. I
used CiscoLab.com.
LabRouter(config)#ip domain-name CiscoLab.com
* We generate a certificate that will be used to encrypt the
SSH packets using the crypto key generate rsa command.
Take note of the message that is displayed right after we enter
this command: "The name for the keys will be:
LabRouter.CiscoLab.com" -- it combines the hostname of the
router along with the domain name we configured to get the name
of the encryption key generated; this is why it was important
for us to, first of all, configure a hostname then a domain
name before we generated the keys.
