With fast development of our modern [2V0-72.22](#) time, People's life pace is getting quicker and quicker.

NEW QUESTION: 1

You implement Azure Redis Cache to allow .NET applications to store customer session data for cache clients. You have the following .NET Core class library. The class library defines lazyConnection as a static private variable as shown in the following code. (Line numbers are included for reference only.)

The method must update the database and invalidate the cache using the correct methods and parameters.

Operations mus'&e performed asynchronously wherever possible. You must ensure that the operation in the client application does not result in another client retrieving stale cache data.

You need to implement the code.

Answer:
