**Answer: A,C**

Explanation:  
Explanation

B: By default, storage accounts accept connections from clients on any network. To limit access to selected networks, you must first change the default action.

Azure portal

- \* Navigate to the storage account you want to secure.
- \* Click on the settings menu called Firewalls and virtual networks.
- \* To deny access by default, choose to allow access from 'Selected networks'. To allow traffic from all networks, choose to allow access from 'All networks'.
- \* Click Save to apply your changes.

E: Grant access from a Virtual Network

Storage accounts can be configured to allow access only from specific Azure Virtual Networks.

By enabling a Service Endpoint for Azure Storage within the Virtual Network, traffic is ensured an optimal route to the Azure Storage service. The identities of the virtual network and the subnet are also transmitted with each request.

**NEW QUESTION: 3**

A customer currently manages their Symmetrix V-Max array environment with SYMCLI within the administrative storage group. They are instituting a third-shift operations group that will perform storage tasks such as device creation, device mapping, and LUN masking.

What solution fits this expanding business requirement and organizational change?

- A. Symmetrix Management Console
- B. EMC z/OS Storage Manager
- C. Symmetrix Manager
- D. Automated Resource Manager

**Answer: A**

**NEW QUESTION: 4**

The customer is looking for a solution that can manage the Symmetrix V-Max array environment and provide a self-service portal for the third-shift operations group. The solution should be able to perform device creation, device mapping, and LUN masking. The solution should also be able to integrate with the existing Symmetrix environment and provide a single point of management for the storage environment.

- A. Symmetrix Management Console
- B. EMC z/OS Storage Manager
- C. Symmetrix Manager
- D. Automated Resource Manager

**Answer: C**
