NEW QUESTION: 1

Cloud computing relies heavily on which of the following virtualization characteristics? (Select two.)

- A. User federation
- B. Information sharing
- C. Simplistic setup
- D. Hardware independence
- E. Scalable resources

Answer: D,E

Explanation:

Explanation/Reference:

Explanation:

B: Virtualization is a conversion process that translates unique IT hardware into emulated and standardized software-based copies. Through hardware independence, virtual servers can easily be moved to another virtualization host, automatically resolving multiple hardware-software incompatibility issues. As a result, cloning and manipulating virtual IT resources is much easier than duplicating physical hardware.

D: Infrastructure as a Service (IaaS) is a form of cloud computing that provides virtualized computing resources over the Internet. IaaS platforms offer highly scalable resources that can be adjusted on-demand.
