**Answer: B,D**

**NEW QUESTION: 3**

Your administration server goes down. One of the managed server of the domain is also currently shut down.

This managed server has been successfully started in the past. You cannot bring up the administration server right away, but you need to start the managed server. You run the start script, but the managed server will not start.

Explain this.

- A. This managed server has disabled Managed Server Independence mode
- B. This managed server must reside on the same machine as the admin server
- C. The domain must use the embedded LDAP for authentication. Without the admin server, the managed server cannot get updates to its local LDAP store
- D. This managed server must be part of a cluster and the cluster master is also down
- E. Managed servers always contact their admin server for the latest configuration. When the admin server is down, a managed server cannot be started.

**Answer: A**
