Manager.
Answer: C

NEW QUESTION: 2
HOTSPOT
You have a server named Server1 that has the Web Server (IIS)
server role installed.
You obtain a Web Server certificate.
You need to configure a website on Server1 to use Secure
Sockets Layer (SSL).
To which store should you import the certificate? To answer,
select the appropriate store in the answer area.
Hot Area:

Answer:
Explanation:

Explanation/Reference:
Explanation:
When you enable secure communications (SSL and TLS) on an
Internet Information Services (IIS) computer, you must first
obtain a server certificate.
If it is a Self-Signed certificate, it only can be used on the
local server machine.
If it is a public certificate, you'll need to download the CA
root certificate of the certificate and install the CA root
certificate into the Trusted Root Certificate Authorities
store.
Root certificates provide a level of trust that certificates
that are lower in the hierarchy can inherit. Each certificate
is inspected for a parent certificate until the search reaches
the root certificate.
