NEW QUESTION: 1
You have an Azure Active Directory (Azure AD) tenant.
You have an existing Azure AD conditional access policy named
Policy1. Policy1 enforces the use of Azure AD-joined devices
when members of the Global Administrators group authenticate to
Azure AD from untrusted locations.
You need to ensure that members of the Global Administrators
group will also be forced to use multi-factor authentication
when authenticating from untrusted locations.
What should you do?
A. From the Azure portal, modify session control of Policy1.
B. From the multi-factor authentication page, mo
C. From the multi-factor authentication page, modify the user
settings.
D. From the Azure portal, modify grant control of Policy1.
Answer: D
Explanation:
There are two types of controls:
Grant controls - To gate access
Session controls - To restrict access to a session
Grant controls oversee whether a user can complete
authentication and reach the resource that they're attempting
to sign-in to. If you have multiple controls selected, you can
configure whether all of them are required when your policy is
processed. The current implementation of Azure Active Directory
enables you to set the following grant control requirements:
