NEW QUESTION: 1

You are managing a large construction portfolio. Recently, and due to budget cuts, you have been having resources issues on multiple initiatives and has been struggling with maintaining a healthy resource allocations. You are currently analyzing the capability and capacity for scarce machinery resources shared across three major programs in the portfolio. What are you currently applying?

- A. Resource Management Tools
- B. Finite Capacity planning
- C. Resource Smoothing
- D. Resource Schedules

Answer: B

Explanation:

Explanation

First of all, in the exam, initiatives are components.

Finite capacity planning indicates resource bottlenecks and

under and over allocations and is based on priorities that were agreed upon through governance oversight; and performs resource leveling across portfolio components. In this scenario, you are doing resource leveling for bottleneck resources used across multiple components

NEW QUESTION: 2

You have a computer that runs Windows 7.

The computer is configured to use an intranet Microsoft update service location. You need to view the name of the intranet service location.

What should you do?

- A. Open Event Viewer and examine the Application log.
- B. Review the contents of the C:\windows\windowsupdate.log file.
- C. At a command prompt, run Wusa.exe.
- D. Open Windows Update and click View update history.

Answer: B

Explanation:

WindowsUpdate.log Provides information about when the Windows Update Agent connects to the WSUS server and retrieves the software updates for compliance assessment and whether there are updates to the agent components.

NEW QUESTION: 3

An LTM Specialist wants to allow access to the Always On Management (AOM) from the network.

Which two methods should the LTM Specialist use to configure the AOM interface? (Choose two.)

- A. Configure the AOM network address in the GUI under System>Platform.
- B. Log in to the Host via ssh, "ssh aom", and modify the network configuration file.
- C. Choose the network configurator in the AOM menu on the serial port.
- D. Configure the AOM IP from the front panel buttons and LCD.

Answer: B,C

NEW QUESTION: 4

Refer to the exhibit.

Based on the Authentication sources configuration shown, which statement accurately describes the outcome if the user is not found?

- A. If the user is not found in the remotelab AD but is present in the local user repository, a reject message is sent back to the NAD.

- B. If the user is not found in the local user repository a reject message is sent back to the NAD.
- C. If the user is not found in the local user repository and remotelab AD, a reject message is sent back to the NAD.
- D. If the user is not found in the local user repository a timeout message is sent back to the NAD.
- E. If the user is not found in the local user repository but is present in the remotelab AD, a reject message is sent back to the NAD.

Answer: C

Explanation:

Explanation/Reference:

Explanation:

Policy Manager looks for the device or user by executing the first filter associated with the authentication source. After the device or user is found, Policy Manager then authenticates this entity against this authentication source. The flow is outlined below:

* On successful authentication, Policy Manager moves on to the next stage of policy evaluation, which collects role mapping attributes from the authorization sources.

* Where no authentication source is specified (for example, for unmanageable devices), Policy Manager passes the request to the next configured policy component for this service.

* If Policy Manager does not find the connecting entity in any of the configured authentication sources, it rejects the request.
