NEW QUESTION: 1

A customer owns a small business. The business has 20 client computers. The business does not have an IT department. The customer wants to deploy Microsoft Office 2010 to all of its client computers, but wants to minimize the amount of administrative effort required to manage and maintain the Office 2010 products.

You need to recommend an Office 2010 solution for the customer. What should you recommend?

- A. Office Professional Plus 2010
- B. Office 365
- C. Office Professional Academic 2010
- D. Office Home and Business 2010
- E. Office Home and Student 2010
- F. Office Standard 2010
- G. Office Professional 2010
- H. Office Starter 2010

Answer: B

Explanation:

Note: Office 365 primarily denotes a set of subscription based software services that require monthly or periodic payment of fees to Microsoft Corporation.[2] By contrast, Office 20XX generally refers to a suite of desktop applications that alone by themselves are not subscription based and do not carry monthly fees. Although Office 365 also often refers to cloud-based services rather than desktop applications, certain Office 365 subscription plans include a subscription to Office 20XX desktop applications in addition to cloud-based services.[3] The subscription to Office 20XX desktop applications, by virtue of the subscription, makes the subscription part of an Office 365 offering.
