NEW QUESTION: 1

```
SQL > CREATE INDEX oe.ord_customer_ix1 ON oe.orders  
(customer_id, sales_rep_id) INVISIBLE;  
SQL> CREATE BITMAP INDEX oe.ord_customer_ix2 ON oe.orders
```

(customer_id, sales_rep_id);

- A. Option D
- B. Option F
- C. Option E
- D. Option B
- E. Option A
- F. Option C

Answer: B,D

Explanation:

Not A: Both indexes are created fine.

B: The invisible index ORD_CUSTOMERS_IX1 and the bitmap index are both updated by DML operations on the Orders table.

F: Since ORD_CUSTOMERS_IX1 is invisible only ORD_CUSTOMERS_IX2 is used by the query optimizer.

Not C,Not D,Not E:

* ord_customer_ix1 is an invisible index and is therefore not used by the optimizer.

* VISIBLE | INVISIBLE Use this clause to specify whether the index is visible or invisible to the optimizer. An invisible index is maintained by DML operations, but it is not be used by the optimizer during queries unless you explicitly set the parameter OPTIMIZER_USE_INVISIBLE_INDEXES to TRUE at the session or system level.

Note: Specify BITMAP to indicate that index is to be created with a bitmap for each distinct key, rather than indexing each row separately. Bitmap indexes store the rowids associated with a key value as a bitmap. Each bit in the bitmap corresponds to a possible rowid. If the bit is set, then it means that the row with the corresponding rowid contains the key value. The internal representation of bitmaps is best suited for applications with low levels of concurrent transactions, such as data warehousing.

NEW QUESTION: 2

How often does a router issue IGMP Host Membership Reports for group 224.0.0.2?

- A. Every 30 seconds
- B. Every 60 seconds
- C. Every 260 seconds
- D. Every 120 seconds
- E. Never

Answer: E

NEW QUESTION: 3

HOTSPOT

You manage a team of three administrators for an organization that uses Office 365.

You must assign roles for each of the administrators as shown

in the table. You must assign the minimum permissions required to perform the assigned tasks.

You need to assign the correct role to each administrator. Which administrative role should you configure for each user? Select the correct answer from each list in the answer area.

Answer:

Explanation:

NEW QUESTION: 4

You embed a Power BI report in a Microsoft SharePoint Online page.

A user named User1 can access the SharePoint Online page, but the Power BI web part displays the following error message: "This content isn't available." User1 is unable to view the report.

You verify that you can access the SharePoint Online page and that the Power BI report displays as expected. You need to ensure that User1 can view the report from SharePoint Online. What should you do?

- A. Edit the settings of the Power BI web part
- B. Publish the app workspace
- C. Share the dashboards in the app workspace
- D. Modify the members of the app workspace

Answer: B
