### **NEW QUESTION: 2**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com. The domain contains a DHCP server named Server1. All client computers run Windows 10 and are configured as DHCP clients.

Your helpdesk received calls today from users who failed to access the network from their Windows 10 computer.

You open the DHCP console as shown in the exhibit. (Click the Exhibit button.)

You need to ensure that all of the Windows 10 computers can receive a DHCP lease.

Solution: You activate the scope.

Does this meet the goal?

**A.** No

**B.** Yes

**Answer: B**

Explanation:

Explanation

### **NEW QUESTION: 3**

Why is this the best design for the XenServer resource pools?

**A.** This design addresses all of the customer requirements by ensuring appropriate design of resource pools, high availability for critical workloads, such as the database server, as well as incorporating the new storage solution for disaster recovery purposes. This also takes into account server OS machine and desktop OS machine characteristics.

**B.** The resource pools are based on roles, and workloads can be moved from one resource pool to another in case of maintenance as well as for disaster recovery purposes.

**C.** This design is best suitable to the customer requirements because the separation of server workloads and virtual desktop workloads in different resource pools optimizes the performance and high availability.

D. This design is the most suitable since it ensures simple setup with redundancy and meets the requirement of separating the operating system types.

**Answer: A**
