Once you made the resolution to choose us, we will not let you down.

NEW QUESTION: 1

Two components of Genericware2.0 are causing performance issues on a Windows 7 PC. One Generic 2.0 component is currently not

responding and needs to be disabled upon reboot. To prevent further performance issues ensure both components are no longer running upon reboot, without making any other changes to the current system or without deleting registry keys or shortcuts. Instructions: When you have completed the simulation, please select the done button to submit your answer.

Answer:

Explanation:

Please review explanation for detailed answer.

Explanation

Please check the below images for detailed steps to do:

This is a simple one, you will start on the Windows Desktop, "Go to the Start menu and type in the search bar "msconfig". after you're done click on Startup and remove the Tick from the application name provided by the sim (genware.exe I think). When this is done, "Click on the Services tab, and remove the tick from the application name provided by the sim. After that's finished click Apply and OK". and you're "Done".Tip: In disable startup program called "genware2.0" just go to start type msconfig and it will be in start-up column and also in service. Then go to start find folder startup and remove programs icon from that folder you don't have to remove it from trash.

NEW QUESTION: 2

Universal

Containers are used to run applications in a secure and isolated environment. They are based on operating system kernels and provide a lightweight alternative to virtual machines. Containers are used to run applications in a secure and isolated environment. They are based on operating system kernels and provide a lightweight alternative to virtual machines. Containers are used to run applications in a secure and isolated environment. They are based on operating system kernels and provide a lightweight alternative to virtual machines.

A.

Containers are used to run applications in a secure and isolated environment. They are based on operating system kernels and provide a lightweight alternative to virtual machines. Containers are used to run applications in a secure and isolated environment. They are based on operating system kernels and provide a lightweight alternative to virtual machines.

B.

Containers are used to run applications in a secure and isolated environment. They are based on operating system kernels and provide a lightweight alternative to virtual machines. Containers are used to run applications in a secure and isolated environment. They are based on operating system kernels and provide a lightweight alternative to virtual machines.

C. Lightning

Containers are used to run applications in a secure and isolated environment. They are based on operating system kernels and provide a lightweight alternative to virtual machines. Containers are used to run applications in a secure and isolated environment. They are based on operating system kernels and provide a lightweight alternative to virtual machines.

D.

Containers are used to run applications in a secure and isolated environment. They are based on operating system kernels and provide a lightweight alternative to virtual machines. Containers are used to run applications in a secure and isolated environment. They are based on operating system kernels and provide a lightweight alternative to virtual machines.

E. Run Macros

Containers are used to run applications in a secure and isolated environment. They are based on operating system kernels and provide a lightweight alternative to virtual machines. Containers are used to run applications in a secure and isolated environment. They are based on operating system kernels and provide a lightweight alternative to virtual machines.

Answer: C,D,E

NEW QUESTION: 3

View the Exhibit and examine the resource consumption details for the current plan in use by the database instance.

Which two statements are true based on the output? (Choose two.)

Exhibit:

- A. The CPU_WAIT_TIME column indicates the total time that sessions in the consumer group waited for the CPU due to resource management
- B. The CPU_WAIT_TIME column indicates the total time that sessions in the consumer group waited for the CPU due to resource management, I/O waits, and latch or enqueue contention
- C. A user belonging to DSS_QUERIES can log in to a new session but the session will be queued
- D. An attempt to start a new session by the user belonging to DSS_QUERIES fails with an error

Answer: A,C

Explanation:

http://download.oracle.com/docs/cd/B28359_01/server.111/b28310/dbrm009.htm

V\$RSRC_CONSUMER_GROUP

Use the V\$RSRC_CONSUMER_GROUP view to monitor CPU usage and CPU waits. It provides the cumulative amount of CPU time consumed, cumulative amount of time waiting for CPU, and cumulative number of CPU waits by all sessions in each consumer group. It also provides a number of other measures helpful for tuning.

```
SQL> SELECT name, active_sessions, queue_length,
consumed_cpu_time, cpu_waits, cpu_wait_time FROM
v$rsrc_consumer_group;
```
