NEW QUESTION: 3

You are developing an application that includes a class named Customer. The application will output the Customer class as a structured XML document by using the following code segment:

You need to ensure that the Customer class will serialize to XML. You have the following code:

Which code segments should you include in Target 1, Target 2, Target 3 and Target 4 to complete the code? To answer, drag the appropriate code segments to the correct targets. Each code segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Answer:
Explanation:

Explanation
