NEW QUESTION: 3
After a production outage, which of the following documents contains detailed information on the order in which the system should be restored to service?
A. Succession planning
B. Disaster recovery plan

C. Business impact analysis
D. Information security plan
Answer: B
Explanation:
A disaster-recovery plan, or scheme, helps an organization respond effectively when a disaster occurs. Disasters may include system failure, network failure, infrastructure failure, and natural disaster. The primary emphasis of such a plan is reestablishing services and minimizing losses.
Incorrect Answers:
A. Succession planning outlines those internal to the organization that has the ability to step into positions when they open. By identifying key roles that cannot be left unfilled and associating internal employees who can step into these roles, you can groom those employees to make sure that they are up to speed when it comes time for them to fill those positions.
C. Information security plan focusses on the integrity and confidentiality of documents.
D. A business impact analysis is part of the business continuity planning and focuses on evaluating the processes.
