**NEW QUESTION: 1**

Which of the following measures can protect systems files and data, respectively?

- A. None of the choices.
- B. User account access controls and firewall
- C. Firewall and cryptography
- D. User account access controls and cryptography
- E. User account access controls and IPS
- F. IDS and cryptography

**Answer: D**

Explanation:

Explanation/Reference:

Explanation:

User account access controls and cryptography can protect systems files and data, respectively. On the other hand, firewalls are by far the most common prevention systems from a network security perspective as they can shield access to internal network services, and block certain kinds of attacks through packet filtering.

### **NEW QUESTION: 2**
