NEW QUESTION: 1
A customer network engineer has made configuration changes that have resulted in some loss of connectivity. You have been called in to evaluate a switch network and suggest resolutions to the problems.

Which of statement is true regarding STP issue identified with switches in the given topology?
A. Bpduguard configured on the New_Switch places the access ports in error-disable
B. Rootguard configured on SW2 places the ports in root inconsistent state
C. Loopguard configured on the New_Switch places the ports in loop inconsistent state
D. Rootguard configured on SW1 places the ports in root inconsistent state
Answer: C
Explanation:
On the new switch, we see that loopguard has been configured with the "spanning-tree guard loop" command.

The loop guard feature makes additional checks. If BPDUs are

not received on a non- designated port, and loop guard is enabled, that port is moved into the STP loop- inconsistent blocking state, instead of the listening / learning / forwarding state. Without the loop guard feature, the port assumes the designated port role. The port moves to the STP forwarding state and creates a loop.

NEW QUESTION: 4
Your customer asks you about the Performance Pack. You explain to him that a Performance Pack is a software acceleration product which improves the performance of the Security Gateway. There are two ways to enable or disable this acceleration. The first one is to use the command cpconfig (see the Figure 1). The second one is to use the command fwaccel on off (see the Figure 2).
What is the difference between those two commands?
A. The command cpconfig works on the Security Platform only. The command fwaccel can be used on all platforms.
B. The fwaccel command determines the default setting. The command cpconfig can dynamically change the setting, but after the reboot it reverts to the default setting.
C. The cpconfig command enables acceleration. The command fwaccel can dynamically change the setting, but after the

reboot it reverts to the default setting.
D. Both commands have the same function.
