Free PDF Quiz SAP - C\_ARCIG\_2202 - SAP Certified Application Associate - SAP Ariba Integration with Cloud Integration Gateway Valid Exam Cost

The demo questions are part from the complete C\_ARCIG\_2202 study material, The demos of trial are chosen from the C\_ARCIG\_2202 valid braindumps which contains accurate C\_ARCIG\_2202 test answers and some detailed explanations.

Your success is ensured with 100% Money Back Guarantee, with more people joining in the C\_ARCIG\_2202 exam army, we has become the top-raking training materials provider in the international market.

If you pay for the SAP SAP Certified Application Associate - SAP Ariba Integration with Cloud Integration Gateway sure **Valid C\_ARCIG\_2202 Exam Cost** pass training and receive our products, you just need to download it and then open the installation package, These C\_ARCIG\_2202 exam questions braindumps are designed in a way that makes it very simple for the candidates.

In addition, if you want to know more knowledge about your exam, C\_ARCIG\_2202 exam practice vce can satisfy your demands.

#### **NEW QUESTION: 1**

Identify whether the given statement is true or false.

"When an exception occurs in a try block, each catch statement following the try block is inspected in sequential order, and the last one whose type matches that type of exception is executed."

- A. True
- B. False

**Answer: B**

#### **NEW QUESTION: 2**

Refer to the exhibit.

A technician has installed SwitchB and needs to configure it for remote access from the management workstation connected to SwitchA. Which set of commands is required to accomplish this task?

**A.** SwitchB(config)# interface vlan 1 SwitchB(config-if)# ip address 192.168.8.252 255.255.255.0 SwitchB(config-if)# ip default-gateway 192.168.8.254 255.255.255.0 SwitchB(config-if)# no shutdown

**B.** SwitchB(config)# ip default-network 192.168.8.254 SwitchB(config)# interface vlan 1 SwitchB(config-if)# ip address 192.168.8.252 255.255.255.0 SwitchB(config-if)# no shutdown

**C.** SwitchB(config)# ip default-gateway 192.168.8.254 SwitchB(config)# interface vlan 1 SwitchB(config-if)# ip address 192.168.8.252 255.255.255.0 SwitchB(config-if)# no shutdown

**D.** SwitchB(config)# ip route 192.168.8.254 255.255.255.0 SwitchB(config)# interface FastEthernet 0/1 SwitchB(config-if)# ip address 192.168.8.252 255.255.255.0 SwitchB(config-if)# no shutdown

**E.** SwitchB(config)# interface FastEthernet 0/1 SwitchB(config-if)# ip address 192.168.8.252 255.255.255.0 SwitchB(config-if)# no shutdown

**Answer: C**

Explanation:

To remote access to SwitchB, it must have a management IP address on a VLAN on that switch. Traditionally, we often use VLAN 1 as the management VLAN (but in fact it is not secure). In the exhibit, we can recognize that the Management Workstation is in a different subnet from the SwitchB. For intersubnetwork communication to occur, you must configure at least one default gateway. This default gateway is used to forward traffic originating from the switch only, not to forward traffic sent by devices connected to the switch.

### **NEW QUESTION: 3**

Refer to the exhibit. Which two statements are true? (Choose two.)

- A.** Interface vfc 1871 is pinned to fc interface 1/32 in fabric interconnect B.
- B.** The server has total of six vNICs.
- C.** Server 7 in chassis 4 has been associated with the profile circuit.
- D.** To check the MAC address from server 7/4 interface eth10, you can check the MAC addresses learned on veth 1866 on fabric interconnect B.
- E.** The option failover is enabled on all the interfaces.

**Answer: E**
