NEW QUESTION: 1

What is one way Aruba solutions help healthcare companies support BYOD and BioMed initiatives?

- A.** Aruba IntroSpect strictly enforces HIPPA regulations by only making records available to healthcare providers if the patient provides his or her password.
- B.** Aruba Client Match maximizes performance in a dense environment with many different types of devices, enabling staff to communicate and access records more quickly.
- C.** Aruba ClearPass automatically downloads software on every patient device to constantly track each asset's location, even if it leaves the premises.

D. Aruba Meridian regulates patient access and applies access controls that prevent patients from monopolizing bandwidth and interfering with more important traffic.

Answer: B

NEW QUESTION: 2

Your startup wants to implement an order fulfillment process for selling a personalized gadget that needs an average of 3-4 days to produce with some orders taking up to 6 months. You expect 10 orders per day on your first day, 1000 orders per day after 6 months and 10,000 orders after 12 months. Orders coming in are checked for consistency, then dispatched to your manufacturing plant for production, quality control, packaging, shipment and payment processing.

If the product does not meet the quality standards at any stage of the process, employees may force the process to repeat a step. Customers are notified via email about order status and any critical issues with their orders such as payment failure. Your base architecture includes AWS Elastic Beanstalk for your website with an RDS MySQL instance for customer data and orders.

How can you implement the order fulfillment process while making sure that the emails are delivered reliably?

A. Use SWF with an Auto Scaling group of activity workers and a decider instance in another Auto Scaling group with min/max=1. Use the decider instance to send emails to customers.

B. Use an SQS queue to manage all process tasks. Use an Auto Scaling group of EC2 instances that poll the tasks and execute them.

Use SES to send emails to customers.

C. Add a business process management application to your Elastic Beanstalk app servers and re-use the RDS database for tracking order status.

Use one of the Elastic Beanstalk instances to send emails to customers.

D. Use SWF with an Auto Scaling group of activity workers and a decider instance in another Auto Scaling group with min/max=1. Use SES to send emails to customers.

Answer: D
