ã½ç"ã•ã, Æã¾ã•™ã€,

Answer: A

Explanation:

On the Access Rule you can define the following:

SourceHosts from which traffic is allowed. Possible values are DB, PUBLIC-INTERNET, or a custom value in the form of an IP address.

DestinationSecurity list to which traffic is allowed. This will be DB, the ora_db security list for the deployment.

PortsPort or range of ports for the rule.

NEW QUESTION: 2

A firm using LIFO accounting has a LIFO reserve of 600, with a LIFO ending inventory of 4,900. It is currently in the 40% tax bracket. If it switches to FIFO accounting, it's equity

- A. increases by 240
- B. increases by 360
- C. decreases by 240
- D. decreases by 360

Answer: B

Explanation:

Explanation/Reference:

Explanation:

The presence of a LIFO reserve implies that by following LIFO, the firm has been able to deduct higher COGS from gross income than under FIFO (remember that LIFO reserve equals inventory value under FIFO minus inventory value under LIFO and this will be positive when the COGS under FIFO is lower than that under LIFO). thus, the retained earnings (and hence equity) is understated by LIFO Reserve*(1 - tax rate). Therefore, when the firm switches from LIFO to FIFO, the equity is increased by $600*(1 - 0.4) = 360$.
