Fortinet NSE6_FWF-6.4 training materials offer three versions for each exam code which satisfy all kinds of demand.

NEW QUESTION: 1

Your network contains two servers named Server1 and Server2 that run Windows Server 2012. Server1 and Server2 have the Hyper-V server role installed and are part of a host group named Group1 in Microsoft System Center 2012 Virtual Machine Manager (VMM).

Server1 and Server2 have identical hardware, software, and settings.

You configure VMM to migrate virtual machines if the CPU utilization on a host exceeds 65 percent. The current load on the servers is shown following table.

You start a new virtual machine on Server2 named VM8. VM8 has a CPU utilization of 20 percent.

You discover that none of the virtual machines hosted on Server2 are migrated to Server1.

You need to ensure that the virtual machines hosted on Server2 are migrated to Server1.

What should you modify from the Dynamic Optimization configuration?

- A. The Aggressiveness level
- B. The Dynamic Optimization threshold
- C. The Power Optimization threshold
- D. The Host Reserve threshold

Answer: A

NEW QUESTION: 2

You have a server named Server1 that runs Windows Server 2016. You need to deploy the first node cluster of a Network Controller cluster. Which four cmdlets should you run in sequence? To answer, move the appropriate cmdlets from the list of cmdlets to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation

NEW QUESTION: 3

Scenario: A company has a network with a central server and several remote sites. The central server is connected to the Internet. The remote sites are connected to the central server via a VPN. The company wants to ensure that traffic from the Internet to the central server is encrypted. Which of the following is the best solution?

- A. Configure a VPN on the central server and the remote sites.
- B. Configure a firewall on the central server and the remote sites.
- C. Configure a proxy server on the central server and the remote sites.
- D. Configure a load balancer on the central server and the remote sites.

Answer: A

NEW QUESTION: 4

Refer to the exhibit. The service provider ACME Internet just added a 100Gbps peering in Paris to use as the default for inbound traffic from Very Big ISP. Which routing policy achieves the desired outcome?

- A. Apply an export policy in New York and Tokyo that adds a Weight attribute to routes sent to Very Big ISP via Paris
- B. Apply an export policy in Paris by applying a MED or Community attribute with a preference M Very Big ISP ads upon
- C. Apply an export policy that only permits a default route in Brussels and Zurich

D. Use traffic engineering by injecting a preferred LocalPref attribute to routes advertised to Very Big ISP in Paris

Answer: B
