Answer: D

NEW QUESTION: 2
Kiawah Corp. sold bonds at a price of 96.2 plus accrued
interest. At the time of this issuance, the carrying value of
the bonds would be less than: Face Value of the Bonds : Cash
Received by Kiawah
(ignore fees)
A. Yes : Yes
B. Yes : No
C. No : Yes
Answer: A

Explanation:
Since the carrying value (face value less discount) at issuance
is equal to the purchase price, the carrying amount would be
less than both the face value (price of 100) and the cash
received since the latter includes accrued interest.

NEW QUESTION: 3
A user is configuring a CloudWatch alarm on RDS to receive a
notification when the CPU utilization of RDS is higher than
50%. The user has setup an alarm when there is some inactivity
on RDS, such as RDS unavailability. How can the user configure
this?
A. Setup the notification when the state is Insufficient Data
B. Setup the notification when the CPU is more than 75% on RDS
C. Setup the notification when the CPU utilization is less than
10%
D. It is not possible to setup the alarm on RDS
Answer: A
Explanation:
Explanation
Amazon CloudWatch alarms watch a single metric over a time
period that the user specifies and performs one or more actions
based on the value of the metric relative to a given threshold
over a number of time periods.
The alarm has three states: Alarm, OK and Insufficient data.
The Alarm will change to Insufficient Data when any of the
three situations arise: when the alarm has just started, when
the metric is not available or when enough data is not
available for the metric to determine the alarm state. If the
user wants to find that RDS is not available, he can setup to
receive the notification when the state is in Insufficient
data.
