NEW QUESTION: 1

The sales operations team at Universal Containers wants to ensure that when an opportunity is won the custom shipment date field is populated.

How should the administrator configure salesforce to meet this requirement?

- A.** Create a validation rule on the opportunity using the ISBLANK() function.
- B.** Make the shipment date field required on the opportunity page layout.
- C.** Create a dependency between the stage and shipment date fields.
- D.** Add a default value to the shipment date using the Today() function.

Answer: A

NEW QUESTION: 2

Which term describes a class that has data types that are NOT checked at compile time?

- A. early-bound
- B. static
- C. strongly typed
- D. late-bound

Answer: B

NEW QUESTION: 3

Which two options are characteristics of the Cisco Configuration Professional Security Audit wizard? (Choose two.)

- A. uses interactive dialogs and prompts to implement role-based CLI
- B. displays a screen with fix-it check boxes to let you choose which potential security-related configuration changes to implement
- C. requires users to first identify which router interfaces connect to the inside network and which connect to the outside network
- D. automatically enables Cisco IOS firewall and Cisco IOS IPS to secure the router
- E. has two modes of operation: interactive and non-interactive

Answer: B,C

Explanation:

[http://www.cisco.com/en/US/docs/net_mgmt/cisco_configuration_professional/v2_7/olh/ccp .pdf](http://www.cisco.com/en/US/docs/net_mgmt/cisco_configuration_professional/v2_7/olh/ccp.pdf)

Perform Security Audit This option starts the Security Audit wizard. The Security Audit wizard tests your router configuration to determine if any potential security problems exist in the configuration, and then presents you with a screen that lets you determine which of those security problems you want to fix. Once determined, the Security Audit wizard will make the necessary changes to the router configuration to fix those problems

To have Cisco CP perform a security audit and then fix the problems it has found:

Step 1

In the Feature bar, select Configure > Security > Security Audit.

Step 2

Click Perform Security Audit.

The Welcome page of the Security Audit wizard appears.

Step 3

Click Next>.

The Security Audit Interface Configuration page appears.

Step 4

The Security Audit wizard needs to know which of your router interfaces connect to your inside network and which connect outside of your network. For each interface listed, check

either the Inside or Outside check box to indicate where the interface connects.

Step 5

Click Next> .

The Security Audit wizard tests your router configuration to determine which possible security problems may exist. A screen showing the progress of this action appears, listing all of the configuration options being tested for, and whether or not the current router configuration passes those tests. If you want to save this report to a file, click Save Report.

Step 6

Click Close.

The Security Audit Report Card screen appears, showing a list of possible security problems.

Step 7

Check the Fix it boxes next to any problems that you want Cisco Configuration Professional (Cisco CP) to fix.

For a description of the problem and a list of the Cisco IOS commands that will be added to your configuration, click the problem description to display a help page about that problem.

Step 8

Click Next>.

Step 9

The Security Audit wizard may display one or more screens requiring you to enter information to fix certain problems. Enter the information as required and click Next> for each of those screens.

Step 10

The Summary page of the wizard shows a list of all the configuration changes that Security Audit will make.

Click Finish to deliver those changes to your router.
