CORRECT TEXT
You work for an organization that monitors seismic activity around volcanos. You have a table named GroundSensors. The table stored data collected from seismic sensors. It includes the columns describes in the following table:

The database also contains a scalar value function named NearestMountain that returns the name of the mountain that is nearest to the sensor.
You need to create a query that shows the average of the normalized readings from the sensors for each mountain. The

query must meet the following requirements:
- Include the average normalized readings and nearest mountain name.
- Exclude sensors for which no normalized reading exists.
- Exclude those sensors with value of zero for tremor.
Construct the query using the following guidelines:
- Use one part names to reference tables, columns and functions.
- Do not use parentheses unless required.
- Do not use aliases for column names and table names.
- Do not surround object names with square brackets.

NEW QUESTION: 3
The portfolio management information system (PMIS) is often a collection of spreadsheets rather than automated tools. An effective PMIS enables the portfolio manager to define, analyze, design, produce, and manage systems to support a successful portfolio. Which of the following is a trait of a

PMIS?
A. Archiving legal data
B. Learning hub
C. Recording Stakeholder opinion
D. All of the options
Answer: A
Explanation:
Explanation
PMIS is neither used as a training and learning hub, nor as a recording system for stakeholder opinion. One of its uses is to archive data for future use; which in our case is the option related to archiving legal data
