And our C_BRIM_2020 learning braindumps are easy to understand for the questions and answers are carefully compiled by the professionals, Make sure to purchase the most recent and updated version of C_BRIM_2020 certification practice exam for best preparation of C_BRIM_2020 exam.

There is Software version of our C_BRIM_2020 exam braindumps, it can simulate the real exam environment, By offering you excellent C_BRIM_2020 dumps, Testbells make your career bright and successful.

NEW QUESTION: 1

Your customer is designing a new data center and would like the aggregation layer to be able to route and have Layer 3 capability. What Cisco platform will meet this requirement?

- A. Cisco Nexus 5596 without Layer 3 daughter card
- B. Cisco Nexus 1000v
- C. Cisco MDS 9506 chassis with supervisor engine
- D. Cisco Nexus 7010 switch with Enterprise Services Package

Answer: D

NEW QUESTION: 2

A cloud usage metering scheme allows for which of the following customer chargeback alternatives?

- A. Direct cost
- B. Shared cost
- C. Cost allocation
- D. Cost amortization

Answer: A

Explanation:

CHARGEBACK METHODS

A range of approaches have been developed for implementing chargeback in an organization, as summarized in the figure below. The degree of complexity, degree of difficulty, and cost to implement decreases from the top of the chart [service-based pricing

(SBP)], to the bottom [high-level allocation (HLA)]. HLA is the simplest method; it uses a straight division of IT costs based on a generic metric such as headcount. Slightly more effort to implement is low-level allocation (LLA), which bases consumer costs on something more related to IT activity such as the number of users or servers. Direct cost (DC) more closely resembles a time and materials charge but is often tied to headcount as well.

Figure, Methods for chargeback allocation.

NEW QUESTION: 3

You are responsible for designing an 802.11n controller based wireless LAN for your organization using independent access point technology. The Information Technology team has decided the wireless LAN controllers should be installed on the core layer at the headquarters office location configured for centralized forwarding. Which statements are true concerns with respect to this type of installation (select TWO)?

- A. Network core layer deployments should always use 10 Gigabit (or faster) Ethernet components.

- B.** With centralized forwarding enabled all wireless traffic is tunneled to the WLAN controller that is connected to the network core layer.
- C.** S02.11n independent access points require the controller be installed at the network access layer only.
- D.** The WLAN controller at the core layer may be a bottleneck and limit scalability if not properly planned.

Answer: B,D

NEW QUESTION: 4

Scenario: A customer network engineer has edited their OSPF network configuration and now your customer is experiencing network issues. They have contacted you to resolve the issues and return the network to full functionality.

After resolving the issues between R3 and R4. Area 2 is still experiencing routing issues. Based on the current router configurations, what needs to be resolved for routes to the networks behind R5 to be seen in the company intranet?

- A.** Add ip ospf authentication-key CISCO to R4 Ethernet 0/1 and add area 2 authentication to the R4 OSPF routing process.
- B.** Add ip ospf authentication-key 7 BEST to the R4 Ethernet interface that connects to R5 and ip ospf authentication-key 7 BEST to R5 Ethernet interface that connects to R4.
- C.** Configure R4 and R5 to use MD5 authentication on the Ethernet interfaces that connect to the common subnet.
- D.** Configure Area 1 in both R4 and R5 to use MD5 authentication.

Answer: A

Explanation:

Here, we see from the running configuration of R5 that OSPF authentication has been configured on the link to R4:

However, this has not been done on the link to R5 on R4:
