NEW QUESTION: 2
Your network contains a Windows Server Update Services (WSUS)
server.
You need to ensure that the WSUS server automatically downloads
service packs.
What should you do first?
A. From the Products and Classifications options, modify the
Classifications settings.
B. From the Automatic Approvals options, modify the Update
Rules list.
C. From the Products and Classifications options, modify the
Products settings.
D. From the Automatic Approvals options, modify the Advanced
settings.
Answer: A
Explanation:
Service Packs are an Update Classification. By specifying
Service Packs from the Classifications settings, we will ensure
WSUS downloads all Service Packs, regardless of the product
they are available for.Reference:
http://technet.microsoft.com/en-us/library/dd939871%28v=ws.10%2
9.aspx
WRONG ANSWERS
The Automatic Approvals options is for handling how updates are
determined for automatic approval. For instance, we could
specify we only want certain Classifications of downloads to be
automatically approved, but this is not directly related to
whether the server downloads them, and it could have negative
affects for other Classifications of updates.Reference:
http://technet.microsoft.com/en-us/library/cc708474%28v=ws.10%2
9.aspx

Products settings determine which programs WSUS will get
updates for (ie, Windows, Office, SQL Server, Visual Studio).
