#### **NEW QUESTION: 1**

ORD is a private synonym for the OE.ORDERS table.

The user OE issues the following command: DROP SYNONYM ord;

Which statement is true regarding the above SQL statement?

- A. The synonym would be dropped and the packages referring to the synonym would be dropped.
- B. The synonym would be dropped and the corresponding table would become invalid.
- C. Only the synonym would be dropped.
- D. The synonym would be dropped and any PUBLIC synonym with the same name becomes invalid.

**Answer: C**

### **NEW QUESTION: 2**

DRAG DROP You are designing a SQL Server Integration Services (SSIS) package. The package moves order-related data to a staging table named Order. Every night the staging data is truncated and then all the recent orders from the online store database are inserted into the staging table. Your package must meet the following requirements:

If the truncate operation fails, the package execution must stop and report an error.

If the Data Flow task that moves the data to the staging table fails, the entire refresh operation must be rolled back.

For auditing purposes, a log entry must be entered in a SQL log table after each execution of the Data Flow task.

The TransactionOption property for the package is set to Required. You need to design the package to meet the requirements. How should you design the control flow for the package? (To answer, drag the appropriate setting from the list of settings to the correct location or locations in the answer area.)

Select and Place:

**Answer:**

Explanation:

Explanation:

-- BURGOS - YES --\BURGOS

According to these references, this answer looks correct.
