NEW QUESTION: 1

You are developing an application that includes a class named Warehouse. The Warehouse class includes a static property named Inventory- The Warehouse class is defined by the following code segment. (Line numbers are included for reference only.)

You have the following requirements:

- * Initialize the `_inventory` field to an Inventory instance.
- * Initialize the `_inventory` field only once.
- * Ensure that the application code acquires a lock only when the `_inventory` object must be instantiated.

You need to meet the requirements.

Which three code segments should you insert in sequence at line 09? (To answer, move the appropriate code segments from the list of code segments to the answer area and arrange them in the correct order.)

Answer:

Explanation:

Explanation

After taking a lock you must check once again the `_inventory` field to be sure that other threads didn't instantiate it in the meantime.

First, you check if the inventory is null, if so, you lock it to avoid other threads to change it.

Second, you check again for the null, as in the tiny millisecond between check for null and locking could another thread get it.

Finally you create the instance and release the lock.

NEW QUESTION: 2

A customer needs to determine the optimal distribution strategy for the ORDERS fact table in its Redshift schema. The ORDERS table has foreign key relationships with multiple dimension tables in this schema.

How should the company determine the most appropriate distribution key for the ORDRES table?

- A. Identity the largest and most frequently joined dimension table and ensure that it and the ORDERS table both have EVEN distribution
- B. Identify the target dimension table and designate the key of this dimension table as the distribution key of the ORDERS table
- C. Identify the largest and most frequently joined dimension table and designate the key of this dimension table as the distribution key for the orders table
- D. Identity the smallest dimension table and designate the key of this dimension table as the distribution key of ORDERS table

Answer: C

NEW QUESTION: 3
